- Contractor: K Construction
- Project Engineer: Principal Engineering

Project Description – Scope of Work

The work consists of converting an existing self-priming sewer lift station to a submersible station. Demolition includes pumps, valves, discharge piping, and accessories, pump housing, concrete lids, and electrical equipment. Flow control to provide for continuous operation of the existing station is required as is all other incidental work as detailed on the plans and stated in the specifications.

Construction will consist of the following:

- ❖ Conversion of existing self-priming sewer lift station to submersible lift station
- ❖ Demolition of existing concrete lids and removal of pumps, piping, accessories, and electrical equipment
- ❖ By-pass pumping
- ❖ Installation of new pumping equipment, electrical equipment and concrete lids
- ❖ Removal and replacement of wooden privacy fence
- ❖ Drainage work including removal and replacement of catch basin and drain pipe
- ❖ Contractor shall perform work complete, in place, and ready for continuous service
- ❖ All other incidental work as required.

Project Locations

Lift Station 30 is located in the 1300 block of North Causeway Approach Service Road
